DIGITAL UPGRADATION
FOR MICROSCOPES & SLITLAMPS

MICROSCOPE CAMERA ADAPTERS

- Can be attached to any microscope.
- Offers minimum light loss to the surgeon.
- High quality optics used.
- Available in 90:10, 80:20, 70:30 & 50:50 splitting ratios.
- HD C-mounts to get an excellent quality of image.
- Camera mounts are available with focal length from 52 to 107mm.

CAMERA SYSTEMS FOR MICROSCOPES

Three Chip High Definition Camera

Three Chip Standard Definition Camera

Single Chip High Definition Camera

Single Chip Standard Definition Camera

SLIT LAMP CAMERA ADAPTERS

Attach your Digital SLR camera to the slit lamp microscope. DSLR Camera provides you with the best quality of images as well as with HD/4K video recording capability. Wirelessly transfer data to your computer or smart phone. Use any DSLR Camera of Nikon, Canon or Sony.

SMART PHONE SLITLAMP ADAPTERS

This is the most affordable option for slitlamp photography. It can be used to mount a smart phone to the slit lamp and take images of your patients. This can be used with any slitlamp of your choice.
